A fresh eBook with an all new standpoint. It is actually written in simple words and phrases instead of difficult to understand. You won't sense monotony at any moment of your own time (that's what catalogs are for relating to if you question me).

Brand New Book ***** Print on Demand *****.Within the four chapters of this book, I point out the greatest arguments that exist today, against The Theory of Evolution. It is of course claimed by evolutionists and atheists who hold to evolutionary theories as explanation for all that exists, that creationists, intelligent design proponents and those who hold to biblical views, are simply in denial regarding scientific proofs for Darwinism, which became what is now recognized as evolution and that is claimed by some in the scientific community, to now be as factual as the laws of gravity. The problem however with the view that evolution is proven, is the fact that it is not a single theory at all but a collection of a vast number of theories. Branching off from the main theory, are what we might call sub-theories including the big bang, the wide range of guesses in regard to the age of things that exist and their varied guesses about which species evolved into advanced ones, going back to their earliest time of existence. The proposed answers for all of these sub-theories range greatly between scientists who study them. Within the chapters, I present some of the biggest questions that remain unanswered by the proposed Theory of Evolution. It might be said by proponents of the theory that it is ridiculous to question it because science has yielded all of the answers that are needed, to bring substantiation for everything that exists having come from an unguided, non-purposed, undirected impersonal process called evolution. We who are observing the announcements by scientists who claim to be finding evidence for evolution within cell studies and fossil finds, would disagree however and we absolutely do...
