DIGITAL CAPITALISM: NETWORKING THE GLOBAL MARKET SYSTEM

MIT Press Ltd, United States, 2000. Paperback. Book Condition: New. Revised ed.. 227 x 151 mm. Language: English . Brand New Book. The networks that comprise cyberspace were originally created at the behest of government agencies, military contractors, and allied educational institutions. Over the past generation or so, however, a growing number of these networks began to serve primarily corporate users. Under the sway of an expansionary market logic, the Internet began a political-economic transition toward what Dan Schiller calls digital capitalism. Schiller traces these metamorphoses through three critically important and interlinked realms. Parts I and II deal with the overwhelmingly neoliberal or market-driven policies that influence and govern the telecommunications system and their empowerment of transnational corporations while at the same time exacerbating existing social inequalities. Part III shows how cyberspace offers uniquely supply instruments with which to cultivate and deepen consumerism on a transnational scale, especially among privileged groups. Finally, Part IV shows how digital capitalism has already overtaken education, placing it at the mercy of a proprietary market logic.
